

## Protect your home with Fibered AluReflex

Is an economical and effective solution to protect the roof of your residence. It is ideal for people with very low budget. Very easy to apply. Just prepare the surface and apply a layer of AluReflex PA-750 to the entire surface.

1. Surface Preparation. Remove existing systems, seal cracks with PA-450 and reinforcement mesh, level puddles, put safety rings and air vents in the drains and others. See more details of ASSA surface preparation.
2. To ensure that leaks don't persist with surface preparation work, do a percolation test.
3. Apply PA-750 at a rate of one 5 gallon pail per 700-800 sq.ft. per coat dependent upon roof porosity. Let cure for 24 hours of walking through treatment. **AluReflex PA-750** is ideal for revitalizing and maintaining waterproofing large roofing waterproofing. Available in 5-gallon pails.

With all approvals. Contains fiber. Aluminum color finish. For more information please contact an ASSA certified contractor. [www.assapr.com](http://www.assapr.com).
